VISUAL STYLE guide like a modern Landing page for macro events

- Dark mode by default. Background: deep charcoal/near-black with soft gradient and subtle noise.
- Glassmorphism cards: blurred backdrop, semi-transparent panels, thin borders, soft shadows.
- Accent color: electric cyan + muted purple (sparingly). Use red/orange only for "TOP-EVENT".
- Typography: modern sans for UI (Inter), monospace for the strict output block.
- Micro-interactions: hover glow on buttons/cards, smooth collapse/expand for day sections, loading shimmer.
- Accessibility: WCAG-friendly contrast, focus rings, keyboard navigation for checkboxes/buttons.
